

Price Match Game

Instructions for how to create and link more slides

Create another question

Copy slides 4, 5, and 6

Scroll down to the bottom of all slides

Paste the slides at the end of the power point

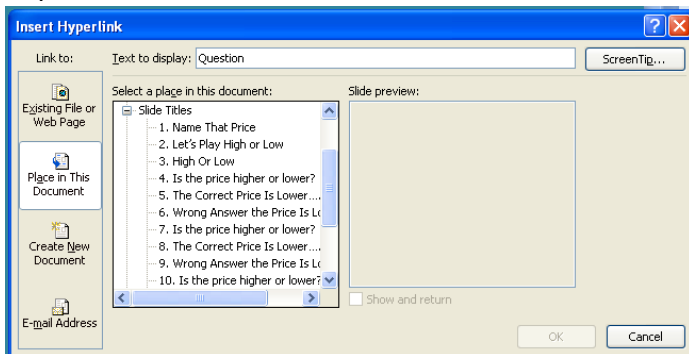

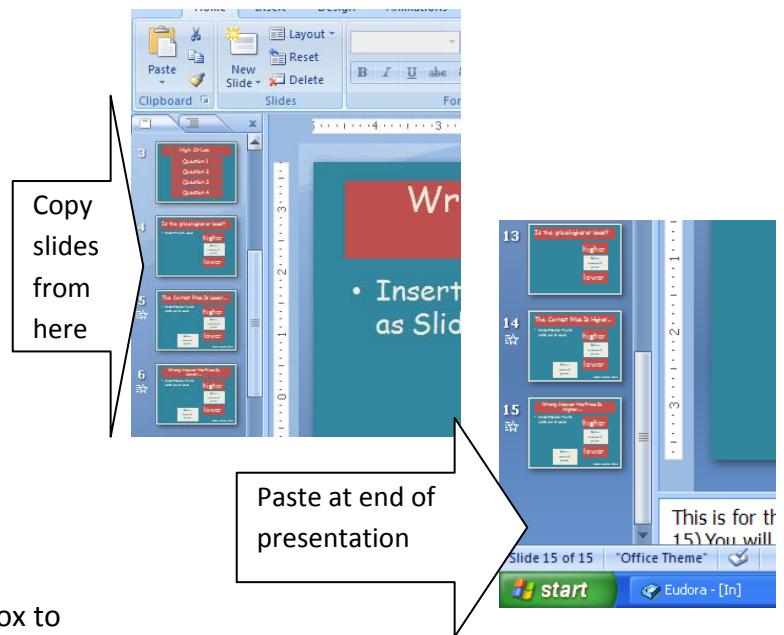

Add the appropriate information to those slides

Go back to slide 3 and hyperlink the 'question #' box to the appropriate slide.

Right click on the box with Question # in it

Click hyperlink. The box below will appear.

Change to place in this document. Search for the slide you want the student to view when he/she clicks on question #

Move the "correct price" box to the place you would like the correct price to appear. Make sure you put the correct price in the appropriate box. On ALL THREE SLIDES. Each box is set up to have a different result.

REMEMBER: you will have to change the hyperlink properties to the appropriate slide... example the correct slide for the second (slide 7) question's "correct price" box would be slide 8 while the all of the incorrect prices should be hyperlinked to slide 9. By just coping and pasting the slides will not change the hyperlink properties.

NOTE: Always test out the game before you let your students play.
