

Hamster Converter

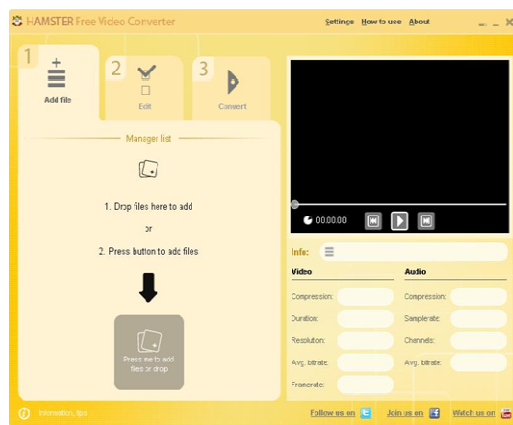

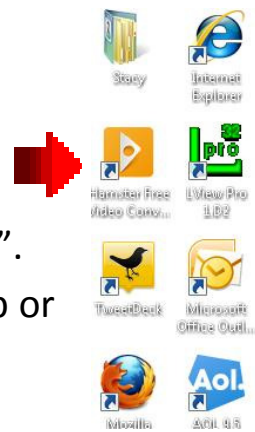

1. Go to Hamster site @ http://download.cnet.com/Hamster-Free-Video-Converter/3000-2194_4-75218449.html and click on the download now link. (18 MB's)

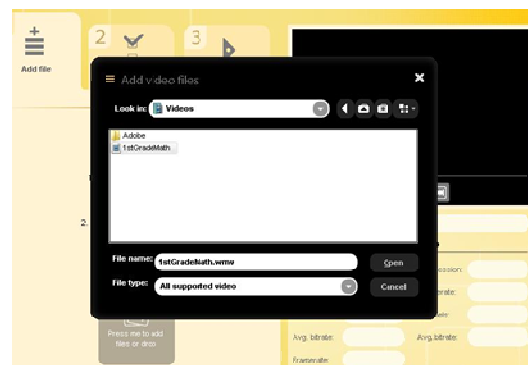

2. You will go to this page. You might have the top tan bar show up. Right click on it and go to "Download File".

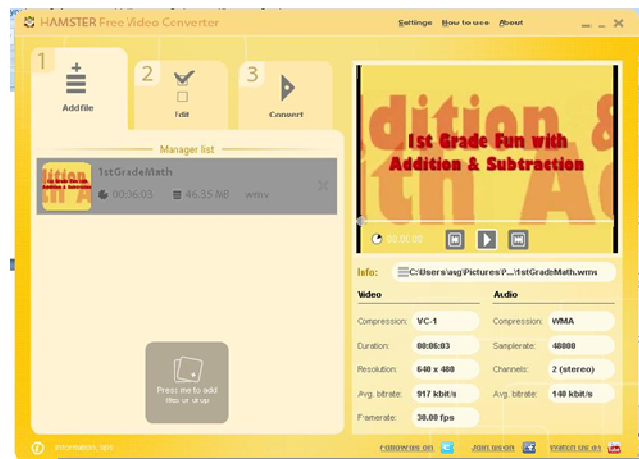

3. You will get a box with “Run”.
4. Then click “Next” and then you will have to accept the agreement. Click for the check to show. Then click “next” again.
5. You will get an “Express Installation”. Click the circle and the install. It will then download and install. It may take a few minutes. Then you will get a message that Hamster has been installed and set up is complete. Now click “exit”.
6. A Hamster icon should show up on your desktop or go to your start menu and click on it.
7. Now the program will open. You will click the “gray area” under #2.

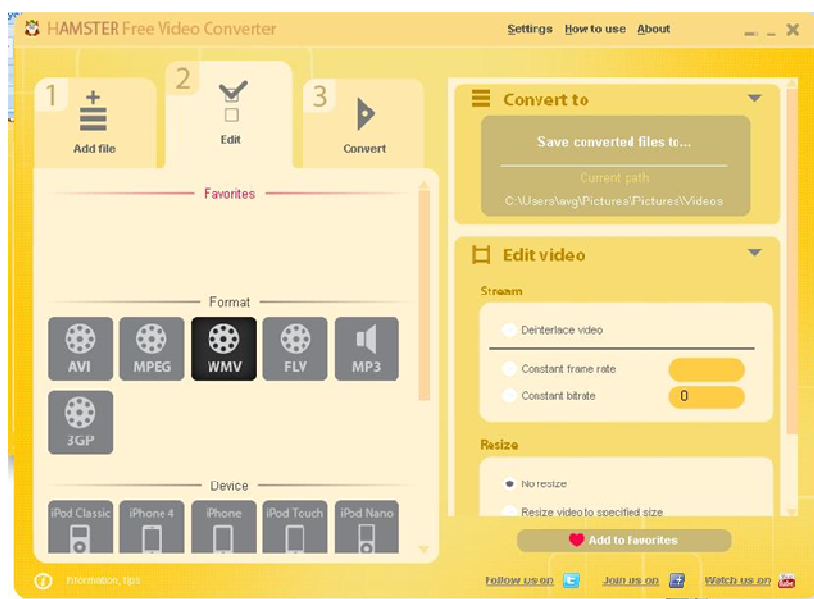

8. Locate the file then click “open”.

9. You will see this screen. Then click the box with “2 edit” at the top.

10. Now choose the type of file you want to view. Normally .wmv (Windows Media Video) is what many choose.

11. Now click #3 at the top (convert). Click “Press to convert.” An hour glass will show up as the file converts. You will then get a box that says complete. Click close or click “open folder with videos.” NOTE: the files will more than likely save in your “Video” folder. You new file should be a “wmv” or the file you wanted to create.
